Available for full-time work from Sep 1, 2026 | 4 days/week

EDUCATION

The University of Hong Kong (HKU) - Faculty of Business and Economics Sep 2026 - Jun 2028
Master of Economics | Hong Kong SAR

Shanghai University of Finance and Economics (SUFE) - School of Information Management & Engineering Sep 2022 - Jun 2026
Bachelor of Engineering, Major in Data Science and Big Data Technology | GPA: 3.5/4.0
Shanghai, China
Honors:People's Scholarship (three-time recipient); Outstanding Graduate.
Core Courses: C++, Python Programming, Data Mining, Computer Applications in Econ & Mgmt, Machine Learning, Principles of Economics

INTERNSHIPS

ByteDance - TikTok Shop Nov 2025 - May 2026
Southeast Asia Strategy & Market Analysis Intern | Shanghai, China

- **Competitive Tracking:** Participated in monthly operating-data tracking for key competitors, improved the tracking model for GMV and other indicators, and refined GMV benchmarking into 40+ comparable categories to help the team identify underperforming categories. Updated the P&L model and reviewed quarterly financial reports to understand competitors' financial performance and strategic adjustments.
- **Project Research:** Addressed business questions and challenges through data tracking, expert interviews, and research analysis:
  1. Merchant Operations: Organized 30 interviews and 1,400 questionnaires; analyzed profitability and growth across 6 countries and 26 categories; supported operating-red-line definitions and summarized 3 platform pain-point categories.
  2. B2B Potential: Analyzed millions of purchase records, identified inflection points, and defined target-user thresholds.
  3. Scenario Planning: Updated the P&L model and simulated platform scale, profitability, and strategic priorities under 6 competitive scenarios.
- **AI Skill Development:** Independently designed an AI Skill to automate monthly platform-coupon analysis and connected it to Feishu for automated data reading, standardized extraction, month-over-month comparison, and result write-back. The Skill rapidly identified changes in coupon strategies across platforms and months, improving efficiency by 600%.

Postal Savings Bank of China - Hubei Branch Jul 2025 - Sep 2025
Operations Center, Risk Control Intern | Wuhan, China

- **Risk Monitoring:** Applied data models to identify 5 categories of risk and conducted off-site inspections of cash management, self-service equipment, and mobile operations across institutions under the branch over the preceding 3 months. Proposed accountability actions for identified violations and supervised the completion of 4 remediation cases.

ZTE Corporation Jan 2025 - Feb 2025
Finance Cloud Department, Financial Digitalization Intern | Xi'an, China

- **Financial Audit:** Participated in 3 audit projects, used digital tools to verify the authenticity of reimbursement data, identified and analyzed suspicious items, and conducted interviews to validate the circumstances.
- **Internal Communications:** Created 3 WeChat articles on reimbursement topics and independently completed the full process from proposal development and scriptwriting to layout design; each article received 20,000+ views.
- **Programming Project:** Addressed the department's monthly exchange-rate collection needs by using a Python web crawler to collect exchange-rate data from 50 websites and organize and save the data in the required format.

Guotai Haitong Securities Co., Ltd. Jul 2024 - Sep 2024
Private Client Division, Research Group Intern | Shanghai, China

- **Market Viewpoint Research:** Completed 2 monthly market-viewpoint reports by collecting and organizing fund managers' views from product roadshows, due-diligence meetings, strategy conferences, exchange meetings, and quarterly reports.
- **Data Analysis:** Collected real-time data from iFinD, Wind, and other platforms, tracked product performance, and used Excel and Python to create charts and analyze relevant indicators.

PROJECT EXPERIENCE

Chinese Collegiate Computing Competition Dec 2024 - Jul 2025
National Second Prize
Project: "Tech for Equality - Social Fairness and Development Driven by GAI Innovation"

- **Project Overview:** Focused on the inclusive development of generative AI and used data analysis to assess the opportunities and risks of technology inclusion across individual, industry, regional, and national dimensions, proposing corresponding policy recommendations and development pathways.
- **Data Analysis:** Collected data through web crawlers and other channels and applied NLP sentiment analysis, principal component analysis, panel regression, and spatial-effects analysis.
- **Deliverables:** Contributed to the full research report, prepared the defense presentation and explanatory video, and led communications with the faculty advisor and 3 rounds of defense, winning the National Second Prize.

Multi-Agent Simulation of E-Commerce Platform Commission and Subsidy Strategies
Undergraduate Thesis

- **Model Development:** Abstracted e-commerce competition into a multi-agent simulation with four types of participants, modeling how platform strategy changes affect agent decisions and ecosystem outcomes.
- **Experiment Design:** Designed 3 groups of experiments - single-platform static, dual-platform static competition, and dual-platform dynamic game - and compared participant decision paths and outcomes under 16 strategy combinations. Examined interaction effects among strategies and used the Pareto frontier to identify the optimal balance among scale growth, revenue capture, and ecosystem stability.

PROFESSIONAL SKILLS

Professional Skills	proficient in PowerPoint and other office software and databases such as Wind; familiar with communications tools, article editing, and video editing.
Data Analytics	Proficient in Python and SQL for data mining, with data analysis and visualization capabilities; familiar with Arena simulation modeling and LaTeX.
English	IELTS 6.5; CET-6; Second Prize in the SUFE Academic English Forum; strong English reading, writing, and speaking skills.
